

Key Features

- Thermal power dissipation up to 20W
- Footprint: 118x99.5mm²
- Height: 10mm
- Work with fan of 800 LFM
- Specific mount holes for MAKO Module
- Black Anodized except for the dissipation surface

The CYBEL RADIANT is a heat sink for the compact OEM Mako module this heat sink can be attach to either the Mako amplifier or the Mako Laser.

RADIANT heat sink dissipates a maximum power of 20W and works efficiently when used with a fan of 800 Linear Feet per Minute (LFM) .
